

LETTER OF RECOMMENDATION

I am pleased to write this letter to recommend Yogesh Gupta for the postgraduate program at your esteemed Institute. I have known him as a student of Bachelors in technology (Electronics and communications engineering), Indraprastha Institute of Information Technology. During the year program, he was doing a research project, AMBI+ under my guidance for a period of three semesters.

Yogesh Gupta has been highly proficient in applying his course knowledge. Overall, he is an intelligent student with good analytical skills. Yogesh Gupta approached me for clarifications and was enthusiastic in taking the project to a business as well as technological level. I strongly believe that his work ethic will take him far in life.

In the light of demanding efforts in the project, Yogesh Gupta took his effort and determination to meet the expectation. He is very modest about his career goals. He has always done his work with full commitment and tried to derive the best results possible.

He has always been interactive and endorses the discussion with ease. He adapts to his surroundings with ease. He has brilliant team leader skills and mindful of his abilities and compassionate towards other's weaknesses.

Further, He has informed me that he has been working as software engineer after he graduated and I am feeling joyous writing this letter of recommendation for him.

I am been nothing but impressed by his academic commitment and social maturity. He will undoubtedly become a positive asset to his peers and professors. Creativity, individuality, and hard work have been the style of this student that has always made him shine. I strongly believe that he will scale to the highest peaks in his field of interest.

Given his competence, sincerity, and motivation I strongly recommend Yogesh Gupta for the master's program in your prestigious university without any reservations.

Please do not hesitate to get in touch with me if there any further queries.

Yours Sincerely,

Signature
